

Thinking of you

Electrolux

**Electrolux Professional
Washer-Dryer**

All in One:
the Unique Solution
that Fits Everywhere !

The most efficient use of space and the ultimate convenience, all in one machine

Get rid of your old washer and dryer and save space in your laundry by replacing them with the new Electrolux washer-dryer. Just load your linen and press the start button. The only thing you have to do is to wait until it is dried. No need for unnecessary loading and unloading. Save your time!

Hospitality and Healthcare

For all the environments where it is difficult to find the space for an in-house laundry, Electrolux has the solution: the new washer-dryer.

For hotels, where immaculate linen and the highest standard of hygiene make all the difference to your customer's satisfaction, or in nursing homes and children's day nurseries, where the most demanding hygiene standards must be guaranteed.

Launderettes and Apartment House Laundries

After a positive response obtained from the Japanese market, the Electrolux washer-dryer is now also available to the rest of the world. Time is so precious in modern life that a unique machine performing both washing and drying operations is of great support to busy people who need perfect results wash after wash with energy-efficient, low-maintenance machines. In addition, ultra-low noise emissions and easy-to-use machines make the Electrolux washer-dryer the ideal choice for the most demanding customers.

The “3-in-1” machine that speaks and respects the environment!

Wash and Dry

use it as a washer-dryer to save time and make the process easier (no loading and unloading is needed)

Wash Only

increase the washing capacity using it as a washer only, you can treat up to 14 or 27 kgs of dirty laundry and get the best performance

Dry Only

drying only is also possible with this incredibly versatile professional machine

Respects the Environment !

Electrolux laundry machines are designed to be environmentally friendly with reduced water and energy consumption.

In addition, an automatic detergent dosing system minimises the use of chemicals.

Speaks your Language !

Just select one of the pre-set languages and a voice will guide you to set the programme (VGS) you need!

“To start push button”

Economy, performance, time: the perfect balance

The Washer-Dryers are equipped with the Compass Control® which provides a variety of programs for combined washing/drying, as well as separate washing and drying. The unique Wash Triangle technology finds the perfect balance between low water and energy consumption, with shorter processing times whilst maximizing wash results.

Washing/drying – ease of use

- Fill the drum to half load, select one of the WD-programs and select start.
- After the wash cycle is finished the drying will start automatically.
- The drying will be stopped automatically when correct temperature is reached.
- If linen is not unloaded straight away, the drum will rotate a few times per minute to prevent wrinkling.
- Unload clean and dry linen!

Wash Triangle technology

The Washer-Dryers are supplied with program libraries suitable for in-house laundries within the hospitality and healthcare sectors (OPL) and apartment house laundries (AHL). The machines can be configured to suit your needs: Using “Economy” programs help to reduce your running costs. Alternatively, should your needs change, you can reconfigure your machine from the library using “Time” or “Performance”- focused programs. Assign your most frequently used programs to the Quick Start function. One push is enough to obtain clean and dry linen – it can’t get any easier!

Program Combinations		WD AHL	WD OPL	WD COIN
		5A	5G	5L
Program technology		Wash Triangle	Wash Triangle	Special
Wash-Dry programs	no:s	15	15	5
Washing only	no:s	10	7	5
Drying only (time controlled)	no:s	3	3	3
Automatic Weighing System	AWS	•	•	•
Voice Guidance System	VGS (optional)	o	-	o

AHL = apartment house laundries

OPL = in-house laundries (hospitality, healthcare)

COIN = laundrettes

Wash Triangle = programs from the “library” can be activated according to customer needs

Special = efficient programs specially developed for laundrettes

Ergonomic, reliable, and high performance

Electrolux professionals, by taking care of every little detail, have dedicated themselves to provide you with safe and worry-free machines.

Designed for you

Two air intake alternatives are possible:

- Fresh air from outside - in this case the machine is pre-arranged to be connected to the inlet pipe (see illustration)
- Air from the room - in this case the air is forced to pass over the drum. The air is pre-heated, thus saving energy

Increased efficiency

The fan speed can be adjusted in order to fit with the exhaust duct length thus facilitating installing operations. In addition, thanks to the air flow optimisation, the drying efficiency is increased.

Automatic Weighing System (AWS)

For savings on utility costs, AWS is an automatic system which calculates the right amount of water based on load weight. With each wash cycle, AWS automatically determines the weight of the load and adds precisely the right amount of water resulting in reduced water consumption and energy costs. AWS is a software program built into the wash cycle and is available on the Compass Control® and the Exacta Control®.

Long lasting and easy to clean

Double lint filter to increase the Wash-&-Dry machine life. The large filter area allows up to 15 drying cycles before cleaning is needed!

Ultimate ease: one machine, two operations

If you are dreaming of having a machine that performs both washing and drying operations with the simple push of a button, make your dream come true by choosing the new Electrolux Professional Washer-Dryer. A high performance machine with excellent washing results and extracting force, all in one.
